WHAT IS CREATIVE PLAY?

The Global Cardboard Challenge is a fun, playful and inspiring way to foster creativity in children through a simple process called **creative play**. Through creative play, kids engage their imaginations and open up their minds to what's possible – and then they turn their ideas into something real. In this process, children learn to develop and test their own ideas, take chances, solve problems, get input from others and become better creative thinkers (www.imagination.is).
